

Dear FCC. Satellite Radio provides a tremendous service. I can choose any number of channels to provide music, sports, talk and news. I can not imagine having to listen to the local idiotic DJ's and their lame banter again. I would love to get weather and traffic at the local level from my XM service and I am very concerned about this attack from the NAB. Please dont let this organization limit what I can hear. Please do not pass the NAB Petition 04-160. (HR 4026). Competition, Free Enterprise and Freedom of Speach are under attack with this bill.

Thank You!
